---

#### JUSTIFICATION FOR SELECTED MEASUREMENT/METRIC

## 170.315(c)(1 - 3) – Clinical Quality Measures

### Real World Testing 2021

Shows continued functionality of ability of EHR to record, calculate, and produce reporting of clinical quality measures. Reports when calculated are exported automatically as well as preserved to later be easily reloaded with the data as it was the date that the report was ran.

#### CARE SETTING(S)

*List each care setting which is covered by the measure and an explanation for why it is included.*

Care Setting	Justification
Ambulatory Internal/Family Medicine	All care settings have access to utilize this functionality.
Ambulatory Orthopedics	All care settings have access to utilize this functionality.
Ambulatory Allergy Clinics	All care settings have access to utilize this functionality.

#### EXPECTED OUTCOMES

The expected outcome for this measure is that the amount of reports ran for the end and beginning quarters of the year will be substantially higher than the other 2 reporting milestones as providers work to ensure that they are prepared for the qpp upload.

The methodology and ability to perform actions related to Immunizations should be present and uniform across all care settings.

The results of the metrics provided should demonstrate this over time.
