#### WITHDRAWN PRODUCTS

No new products were withdrawn in 2023

## 170.315(c)(1 - 3) – Clinical Quality Measures

Real World Testing 2023

### SUMMARY OF TESTING METHODS AND KEY FINDINGS

The data used for reporting this comes from data tracked across 19 clinics.

Across all settings polled for the year 2023, over 73% of all quality measure reports were generated in the first or last quarters. The highest quantity of reports generated was during the last quarter (October-December) with 41.62% of all cqm's ran during this time.

### STANDARDS UPDATES (INCLUDING STANDARDS VERSION ADVANCEMENT PROCESS (SVAP) AND UNITED STATES CORE DATA FOR INTEROPERABILITY (USCDI))

*Both required and voluntary standards updates must be addressed in the Real World Testing plan. Real World Testing plans must include all certified health IT updated to newer versions of standards prior to August 31 of the year in which the updates were made.*

*Indicate as to whether optional standards, via SVAP and/or USCDI, are leveraged as part of the certification of your health IT product(s).*

☐ Yes, I have products certified with voluntary SVAP or USCDI standards. (If yes, please complete the table below.

☒ No, none of my products include these voluntary standards.

#### Care Setting(s)

*The expectation is that a developer's Real World Testing is conducted within each type of clinical setting in which their certified health IT is marketed. Health IT developers are not required to test their certified health IT in every setting in which it is marketed for use.*

*List each care setting that was tested.*

Ambulatory Internal/Family Medicine
Ambulatory Orthopedics
Ambulatory Allergy Clinics
Other Specialties (including Rheumatology, surgery, neurology)

#### Metrics and Outcomes

##### DESCRIPTION OF MEASUREMENT/METRIC

The number of confirmed historical records of Clinical Quality Measure reports ran for measurement period.

##### ASSOCIATED CERTIFICATION CRITERIA

## 170.315(c)(1 - 3) – Clinical Quality Measures

### Real World Testing 2023

170.315(c)(1) – Clinical Quality Measures (CQMs) – Record and Export

170.315(c)(2) – Clinical Quality Measures (CQMs) – Import and Calculate

170.315(c)(3) – Clinical Quality Measures (CQMs) – Report

### OUTCOMES

The expected outcome expressed in the plan for this measure was that the amount of reports ran for the end and beginning quarters of the year will be substantially higher than the other 2 reporting milestones as providers work to ensure that they are prepared for the qpp upload.

The result data show that most of the CMQ reports generated did take place at the beginning and end of the year. This leads one to believe that most clinics aren't as focused with a specific goal in relation to these items during the reporting period and mostly only run these at the time when they are due to report and upload them during the time in which they must upload them to CMS (which takes place in the first portion of the year).

### RELIED UPON SOFTWARE

No third-party software was relied upon to meet requirements related to this Outcome.

### KEY MILESTONES

*Include a list of key milestones that were met during the Real World Testing process. Include details on how and when the developer implemented measures and collected data. Key milestones should be relevant and directly related to outcomes discussed.*

*For each key milestone, describe when Real World Testing began in specific care settings and the date/timeframe during which data was collected.*

Key Milestone	Care Setting	Date/Timeframe
First Quarter: Observed data over a period of time	Internal Medicine Orthopedics Allergy	Jan - March
Second Quarter: Observed data over a period of time	Internal Medicine Orthopedics Allergy	March - June
Third Quarter: Observed data over a period of time	Internal Medicine Orthopedics Allergy	July - Sept

## 170.315(c)(1 - 3) – Clinical Quality Measures

Real World Testing 2023

Fourth Quarter: Observed data over a period of time	Internal Medicine Orthopedics Allergy	Oct - Dec
